

## KEY FEATURES

- Multichannel analog configurations  
APx582: 8 inputs / 2 outputs  
APx585: 8 inputs / 8 outputs  
APx586: 16 inputs / 8 outputs
- AES/SPDIF digital I/O
- Typical THD+N < -107 dB
- A powerful, intuitive UI with one-click measurements
- Powerful automation and sophisticated reporting
- Support for the complete range of APx digital I/O options

## Channel count meets broad range of digital I/O for simultaneous multichannel audio test

The **APx58x Series** combines an award-winning user interface with Audio Precision's legendary commitment to fast and accurate performance. APx's user-friendly innovations include a range of connectivity options, two easy-to-use UI modes, one-click measurements, code-free automation, a sophisticated reporting engine, and multiple signal paths within a project.

### A true multichannel analyzer

The **APx585** is a true multichannel audio analyzer, with 8 simultaneous analog outputs and inputs for testing multichannel audio devices. A multichannel analyzer allows not just faster testing, but also a complete picture of performance that a two channel analyzer with switchers might miss, such as output sag across channels during full power output tests or phase and crosstalk interactions. With the HDMI option, it is ideal for designing and testing consumer devices such as home theatre receivers.

The **APx586** adds a second input module for 16 simultaneous analog input channels, ideal for high-speed, high-channel count test such as automotive or pro audio mixers and other applications.

The **APx582** provides the same 8 channels of analog input, but with 2 channels of high-performance analog output that includes DIM/TIM distortion tests and selectable output impedances of 20, 50, 75, 100, and 600 Ω.

### Automation and reporting

Repetitive bench tests and production testing can easily be automated with the built-in measurement sequencer, and saved as a project that can be used with any APx analyzer. Production Test mode provides an optional simplified operator interface with multiple run statistics, created and supervised by a manufacturing engineer. Access the API if you prefer: documentation for VB.NET, C#.NET, MATLAB and LabVIEW is included. Create powerful reports with Microsoft Word that let you define your own formatting and add graphs, tables and logs.

APx586 16-channel analyzer

APx582 8-channel analyzer

## OPTIONS

Select the options that match your needs. All models use the same software, so sharing projects is easy and modular hardware allows for future upgrades.

### DIGITAL I/O

<b>Digital Serial</b>	Adds interface for I <sup>2</sup> S, TDM, DSP	<b>PDM</b>	Adds direct connectivity for digital MEMS mics
<b>Bluetooth®</b>	Adds Bluetooth radio for Bluetooth audio test	<b>AMC</b>	Advanced Master Clock adds jitter clock, sync and trigger I/O
<b>HDMI+ARC</b>	Adds HDMI source, sink, monitor, aux and ARC I/O	<b>ADIO</b>	Adds Advanced Digital I/O and Advanced Master Clock modules

## Versatile, Powerful Audio Test

With its redesigned software platform, the powerful APx Audio Analyzer Series provides never-before-seen flexibility and usability. This bold new interface offers users two easy-to-use modes. Choose between Bench Mode for real-time visibility into device behavior across a variety of parameters, and Sequence Mode for fast production testing and automated measurements.

## APx Digital Options

APx audio analyzers offer world-class performance and flexibility. Our modular systems allow you to select the interfaces and options that make sense for the work you do, covering the widest range of digital I/O in the industry. Select models support jitter generation and analysis when installed in AMC-configured APx analyzers.

### HDMI

The APx HDMI option (HDMI+ARC) allows you to measure HDMI audio quality

and audio format compatibility on devices such as surround sound receivers, set-top boxes, HDTVs, smartphones and tablets, and DVD or Blu-ray Disc™ players.

### Bluetooth®

The APx Bluetooth option is the best solution in the world for testing Bluetooth audio.

No other analyzer combines integrated Bluetooth controls with APx's best-in-class speed, ease-of-use and performance.

### Digital Serial

The Digital Serial I/O option adds a multichannel digital serial interface. This provides

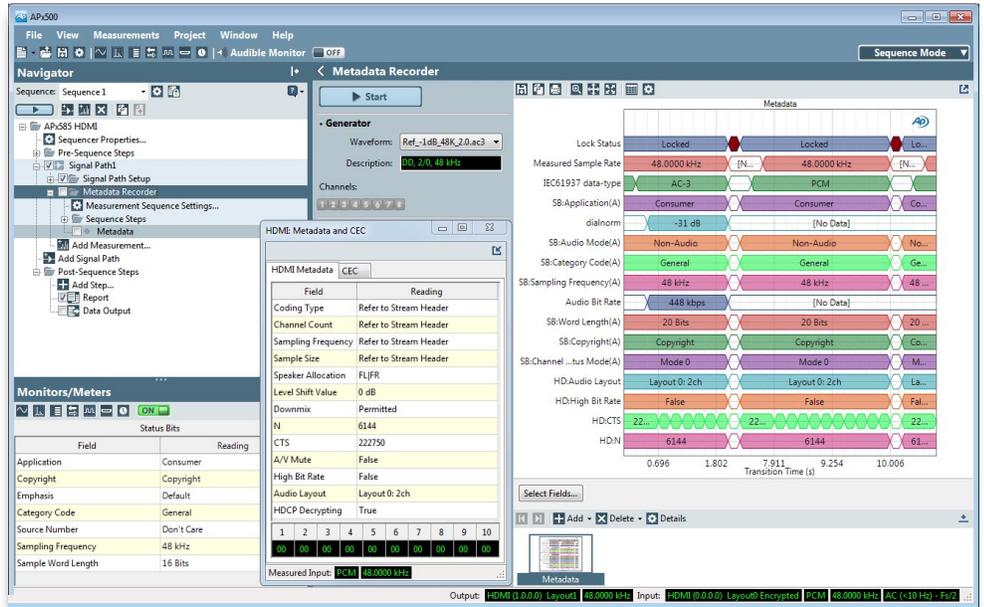

a direct connection to chip-level interfaces such as I<sup>2</sup>S and supports all popular serial interface formats including left justified, right justified, and DSP. This option is jitter capable.

### PDM

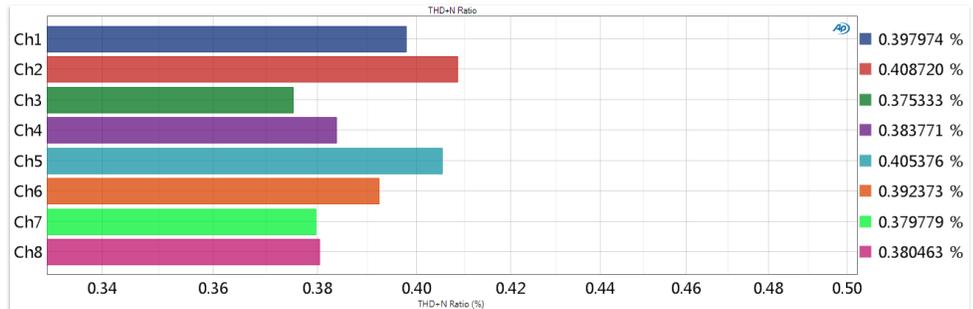

The APx PDM option provides direct connectivity for audio devices that have a PDM

output (such as a MEMS microphone) or input (such as the decimator on a smartphone chip). In addition to all the standard audio measurements, APx provides variable DC voltage, variable sample rate, and a PSR (Power Supply Rejection) measurement to test the device's full operating parameters. This option is jitter capable.

APx500 Measurement Software metadata recorder tracking metadata changes during an HDMI hotplug event.

APx 585 and 586 are true multichannel analyzers; shown above is an 8-channel THD+N Ratio measurement.

## KEY SPECIFICATIONS

### SYSTEM PERFORMANCE

Residual THD+N (20 kHz BW)  
-103 dB + 1.4 μV  
Typical <-108 dB (1 kHz, 2.5 V)

### GENERATOR PERFORMANCE

Sine Frequency Range  
5 Hz to 80.1 kHz  
Frequency Accuracy  
3 ppm  
IMD Test Signals  
SMPTE, MOD, DFD  
Maximum Amplitude (balanced)  
14.4 Vrms  
21.22 Vrms (APx582)  
Amplitude Accuracy  
±0.05 dB  
Flatness (20 Hz - 20 kHz)  
±0.008 dB

Analog Output Configurations  
Unbalanced and balanced  
Digital Output Sampling Rate  
27 kS/s to 200 kS/s\*  
Dolby / DTS Generator  
Yes (encoded file)

\*Optical 27 kS/s to 108 kS/s

### ANALYZER PERFORMANCE

Maximum Rated Input Voltage  
160 Vpk  
Maximum Bandwidth  
1 to 16 channels of analog input 90 kHz  
IMD Measurement Capability  
SMPTE, MOD, DFD  
Amplitude Accuracy (1 kHz)  
±0.05 dB  
Amplitude Flatness (20 Hz - 20 kHz)  
±0.008 dB  
Residual Input Noise (20 kHz BW)  
1.3 μV  
Individual Harmonic Analyzer  
d2-d10  
Maximum FFT Length  
1248K points  
DC Voltage Measurement  
Yes
